STRUCTURAL WORKS AND SITE PREPARATION

02

Sites and facilities

Facility construction, site preparation, metal structures and coordination of site requirements.

Bringing spaces back into use

01 Restoration and maintenance

Rehabilitation and maintenance of offices, educational centres and health facilities.

02 Interior works

Masonry, plastering, painting, gypsum and suspended ceilings.

03 Experience across project types

Dar Misr and De Zeer finishing works, historic home restoration and a health centre in Rafah.

02

ALL TYPES OF SUPPLIES

Client and project requirements, from specifications and quantities to purchasing and delivery coordination.

TRADING / SOURCING / PROCUREMENT

Supplies for your project

We undertake all types of supplies to client specifications and quantities. Examples of requirements include:

Construction materials

Steel, cement, concrete, blocks and timber.

Finishing materials

Tiles, marble, paint and interior materials.

Electrical supplies

Cables, electrical materials and accessories.

Plumbing and water supplies

Pipes, fittings, tanks and water-network supplies.

Technical equipment and tools

Tools, equipment and technical requirements.

Client and project requirements

Other supply requirements to specification and delivery plan.

From a clear brief to delivery

01

Specifications and quantities

Define items, quantities, location and required date.

02

Quotation and terms

Prepare the offer, supply terms and agreed schedule.

03

Purchasing and coordination

Coordinate suppliers and follow up the order requirements.

04

Delivery and follow-up

Coordinate delivery and review conformity and observations.
